

REACH Declaration

ERIKS

ERIKS declares that all articles sold by ERIKS companies in the European Union, meet the requirements of EU REACH legislation EC 1907/2006 (1), in short EU REACH.

To remain compliant with EU REACH, the following actions are in place or will be executed when necessary:

ERIKS maintains extensive contact with its producers and A-brand manufacturers to ensure that any necessary registration and classification of substances has been done upstream.

Our products do not contain any substance which is listed on the 'List of substance subject to authorization'(2) or 'List of restrictions'(3), respectively annex XIV and annex XVII to EU REACH.

If any of the substances used in ERIKS products are added by the ECHA organization to the 'Candidate list of SVHC substances for authorization'(4), or to the 'Registry of restriction under consideration'(5), the actual impact is judged, replacement of the substance will be considered and, in case applicable, will be implemented well before the substance concerned is moved to the 'List of substances subject to authorization' or the 'List of restrictions'.

In case of a substance in one of our products, which is on the 'Candidate list of SVHC substances for authorization' and above the specified limits, information about health and safety risks and information about safe usage will be shared proactively.
